Forecast For East of England
Issued by Met Office Exeter
at 0400 on Tuesday 16 Mar 2021

++ Valid for broadcast between 0600 and 1800

Headline:
Cloudy and damp, very gradually improving. Cold overnight.

Today:
Rather cloudy and damp overall, with spells of rain and drizzle making gradual progress southeast. Gradually becoming brighter from the northwest later in the afternoon, perhaps allowing some late sunshine. Mild in the west, colder and breezy in the east. Maximum temperature 14 deg C (57 deg F).

Tonight:
Becoming generally fine with clear spells into the evening. Temperatures will fall away to perhaps allow a slight local frost in western parts, while eastern parts should stay rather windy. Minimum temperature 2 deg C (36 deg F).

Wednesday:
A chilly start for many, followed by some sunny spells in the west. The east is likely to be cloudier throughout however, perhaps with some light rain for a time. Maximum temperature 11 deg C (52 deg F).

Outlook for Thursday to Saturday:
Periodically rather cloudy and breezy through this period, with some sunshine but also spells of mostly light rain, especially Thursday. Temperatures perhaps becoming rather cold, accentuated by the breeze.
